

October 28, 2024

The Honorable Charles E. Schumer
Majority Leader
United States Senate
Washington, DC 20510

The Honorable Mike Johnson
Speaker of the U.S. House of Representatives
Washington, D.C. 20515

The Honorable Mitch McConnell
Minority Leader
United States Senate
Washington, DC 20510

The Honorable Hakeem S. Jeffries
Democratic Leader
U.S. House of Representatives
Washington, D.C. 20515

Dear Majority Leader Schumer, Minority Leader McConnell, Speaker Johnson, and Democratic Leader Jeffries,

This is a follow-up to our letter of 8 October 2024 that communicated our opposition to legislation to reinstate the Department of Justice's (DOJ) China Initiative and the reasons for our opposition. That letter expressed the considered opinion of 166 Stanford faculty that such legislation would be counterproductive – causing more harm to U.S. scientific and technological leadership than any benefits that would accrue.

Subsequently, we have received endorsements of our 8 October letter from concerned faculty members and senior staff at U.S. colleges and universities and affiliated research laboratories across our nation, located in 46 states and the District of Columbia. Attached to this letter is a list of the 1,918 endorsers.

Many members of this group are talented U.S. citizens and immigrants with deep roots in our country, engaged in research and education across a broad range of fields. Their contributions are critical to U.S. leadership in science & technology and to educating the U.S. STEM workforce of the future. The national security and economic advantages of U.S. leadership in science and engineering are compelling and require that the United States remains an attractive destination for international STEM talent. As recently observed (CSIS, [Innovation Lightbulb: Foreign-born Share of the U.S. STEM Workforce](#)), “Increasingly, these talents are gladly welcomed elsewhere, including by foreign competitors and adversaries. A failure to fully capitalize on our advantage in educating and attracting foreign-born science and engineering talent would be a policy ‘own goal’ in an era of increased geopolitical competition for leadership in advanced technologies.” Our country is strongest when we welcome exceptional and diverse talents from around the world.

Thank you for your attention.

Sincerely yours,

Steven A. Kivelson
Prabhu Goel Family Professor
Professor of Physics

Peter F. Michelson
Luke Blossom Professor in the School of Humanities & Sciences
Professor of Physics
